

A photograph of a bedroom featuring a wooden bunk bed with a ladder, a dresser, and a teddy bear. The bunk bed is made of dark wood and has a ladder on the left side. The top bunk has a striped pillow and a blanket. The bottom bunk has a checkered pillow and a blue teddy bear. The dresser is on the right side of the image, with a small figurine on top. The text "STICKLEY STARTERS" is overlaid in red at the top right, and "ANTIQUITIES BY STICKLEY" is overlaid in white at the bottom right.

# STICKLEY STARTERS

*"I am the fourth generation to sleep in my Stickley® bed.  
My great grandmother Carrie passed it on to my grandmother,  
who passed it on to my mother, who passed it on to me.  
My daughter Carrie will get it next."*

"My Stickley" Submission #106

## SLEEP. PLAY. GROW.

Stickley® has been building furniture to last for generations since 1900. Now we honor this legacy by introducing a collection specifically designed for the youngest generation in your family. Stickley Starters, part of the new Antiquities by Stickley collections, brings Stickley quality, design and Arts and Crafts heritage into your children's rooms.

Designed to grow with your children and versatile enough to fit their changing needs, Stickley Starters includes twin beds and a bunk bed set, with the option of adding below-the-bed storage or a trundle bed for young visitors to use. Stickley Starters also offers a variety of dressers, night stands, desks and tables scaled for children and youths.

This collection is crafted from solid quartersawn white oak, and is available in Stickley's most popular Mission finish, Onondaga (#32).

### **Blind Dovetailed Cross Rails**

*Cross rails on cases are dovetailed into the ends to strengthen the case from side to side. On Mission pieces the dovetail is hidden from view. This joint is self locking, even without glue, and separation of the end panels is impossible, unless the wood is split apart.*

### Side-hung and Center-guided Drawers

*Stickley® is proud to offer drawers that are hand-fitted and numbered, as well as being side-hung and center-guided. This method guarantees proper alignment of the drawer. The center guide keeps the drawer from skewing sideways. Suspension on the side guides keeps the drawer level, even when heavily loaded. There is never any pressure against the bottom side edges, hence no scrape or screech and no excessive friction, pulling or tugging.*
